

Majik Box

Krush

Thank you for the purchase of the Majik Box Krush Distortion. The Krush Distortion was designed in cooperation with James "Munky" Shaffer, guitarist of the iconic metal band Korn to produce the ultimate metal oriented guitar tones out of a pedal. Settings marked in orange (Korn distortion) and white (Lo-Fi distortion) on the pedal; help you to easily dial in Korn's signature distortion tones, and a special setting to produce a Lo-Fi distortion tone that Munky often uses in song intros and breakdowns.

IMPORTANT NOTES:

- 1) YOU MUST USE A CENTER NEGATIVE TIP ADAPTER ONLY. IF YOU'RE UNSURE IF THE ADAPTER YOU PLAN TO USE IS CENTER NEGATIVE TIP, PLEASE EMAIL US AT: info@majikboxusa.com. ADAPTERS FOR PEDALS SUCH AS THE FULLTONE '69, SOULBENDER, OCTAFUZZ PEDALS, MOOGERFOOGER PEDALS AND MANY ELECTRO-HARMONIX PEDALS ARE CENTER POSITIVE. DO NOT USE AN ADAPTER FOR ANY OF THESE PEDALS.
- 2) IF USING AC, PLEASE REMOVE THE BATTERY FIRST.
- 3) THERE IS A KNOWN COMPATABILITY ISSUE WITH THE BOSS BCB 60 CARRYING CASE / AC ADAPTER. PLEASE REFRAIN FROM USING THIS UNIT WITH MAJIK BOX PEDALS.

The Level, Drive and Tone controls basically do what you would expect, but the key to really finding your tone is in the Focus knob. Dialing in the Focus knob will greatly determine the character of the distortion tone. Turning the knob clockwise will provide a sharper mid-range focus, while turning the knob counter clockwise will do the opposite. Start with all the knobs at 12 o'clock, then start adjusting to taste. For best results, use a relatively clean setting on your amp for the heavy distortion tones, and an already somewhat distorted tone on your amp for the "Lo-Fi" distortion tone.

If you want to hear Munky's personal settings right away, place all the knobs at the orange markings for the "Korn" distortion tone. Then try placing all the knobs at the white markings to hear Munky's "Lo-Fi" distortion tone.

Before plugging in, please make sure to use a high quality, discrete power supply such as a Pedal Power 2 or a Fuel Tank to power your Krush Distortion. For battery powered operation, please use a high quality alkaline such as a Duracell, or Energizer. Also use the best quality cables available. These factors will significantly enhance the operation of the Krush Distortion.
